EDUCATION

baccalauréat 2022

- BAC SCIENCE MATH OPTION A
- EMSI 2022-EN COURS**
- INGENIEUR INFORMATIQUE ET RESEAUX

COMPETENCES

- O O P : Python, C/C++, PHP, Java& JEE
- Web & Mobile Development
- Frameworks : Bootstrap, React, Laravel, Node.js, Flask
- .NET with C#
- SQL & NoSQL
- Oracle & administration
- Big Data Ecosystem
- Machine Learning & Data Analysis
- Distributed Systems & IoT
- Networks & Virtualization
- Unix & system administration
- Network & Web Security
- Conception Merise & UML

LANGUES

- French : Advanced
- English : Advanced
- Arabe : Native

SALAHEDDINE MANAA

COMPUTER ENGINEERING & NETWORKS STUDENT

PROFILE

I am a fourth-year engineering student at EMSI Tanger. I am interested in software development, systems, databases, and emerging technologies. I have worked on several web, mobile, and data analysis projects, which has allowed me to strengthen my technical skills, rigor, and ability to manage a project from concept to implementation. I enjoy learning, experimenting, and improving the quality of my work through modern tools and structured methods.

PROJETS

- M-HEALTH** - Hospital Management Mobile App
 - An Android healthcare management app with multi-role access (admin, doctor, secretary, patient). Features include records management, appointments, prescriptions, messaging, AI-based medical image classification (TensorFlow Lite), and hospital mapping.
- PETYPLANT** - Automatic Irrigation System
 - Optimizes irrigation and reduces water usage using sensors that track soil moisture, light, temperature, and water level, controlled via Bluetooth for direct monitoring and time savings. The system also includes a platform with a dedicated website for buying and selling plants, a forum, inventory management, and other useful tools.
- INFRA GARD** - Road Anomaly & Waste Detection
 - Detects road anomalies and classifies waste in real time using a camera, allows complaint submissions, and transmits reports to an admin dashboard showing detailed information and precise geolocation.
- TR(A)UCKER** - Driver Management System
 - A system to improve trip efficiency, driver assignment, and cargo management to reduce costs and increase customer satisfaction, leveraging algorithms and real-time data.

EXPERIENCES

Internship at TECHIUM SARL

-2 months

Developed an Analytics tool – an advanced user tracking module for an e-learning platform. This system provides precise, real-time tracking of user activities (students and teachers).

CERTIFICATS

- Introduction to Machine Learning (Duke UNIVERSITY)
- Interactivité avec JavaScript (UNIVERSITY OF MICHIGAN)
- Introduction to Object-Oriented Programming in C++ (EPFL)
- Software Design and Project Management (HONG KONG UNIVERSITY)
- Using Python to Access Web Data (UNIVERSITY OF MICHIGAN)
- Introduction to NoSQL Databases (IBM)
- Machine Learning with Python (IBM)
